Artificial Lawn-REACH Report

Artificial Lawn-STC Test Report

Artificial Lawn
National Environmental Protection Testing

Artificial Lawn
National Sporting Goods Testing

Features of artificial turf sports fields:

1. Artificial turf is an all-weather venue, completely unaffected by rain and snow. It can be applied in extreme climate areas such as high cold and high temperature plateau.
2. Using the principle of bionics, the foot feeling of the athlete, the rebound speed of the ball, etc. are very close to the natural turf and have good water permeability, and the water can be drained cleanly within 20 minutes after heavy rain.
3. Besides having many natural lawn merits, artificial lawn is abrasion resistance. Pu racetrack of artificial of artificial lawn court can use 5mm max spiked shoes
4. The turf will not fade for a long time, it is easy to maintain, and the foundation requirements are not high. It can be constructed on asphalt, cement and hard sand, and the cycle is short. It is especially suitable for high-density primary and secondary schools with long training time.

Artificial turf

We can produce various kinds of artificial turf with pile height from 10 to 70mm, single layer backing, bonar double backing and compound backing, lining or cross turfed, 4m width and tailor made length, durability of more than 6 years home made and over 8 years for bonar and Thiolong type.
